

The Impossible Puzzle of Cybersecurity

Independent survey of 3,100 IT managers in 12 countries

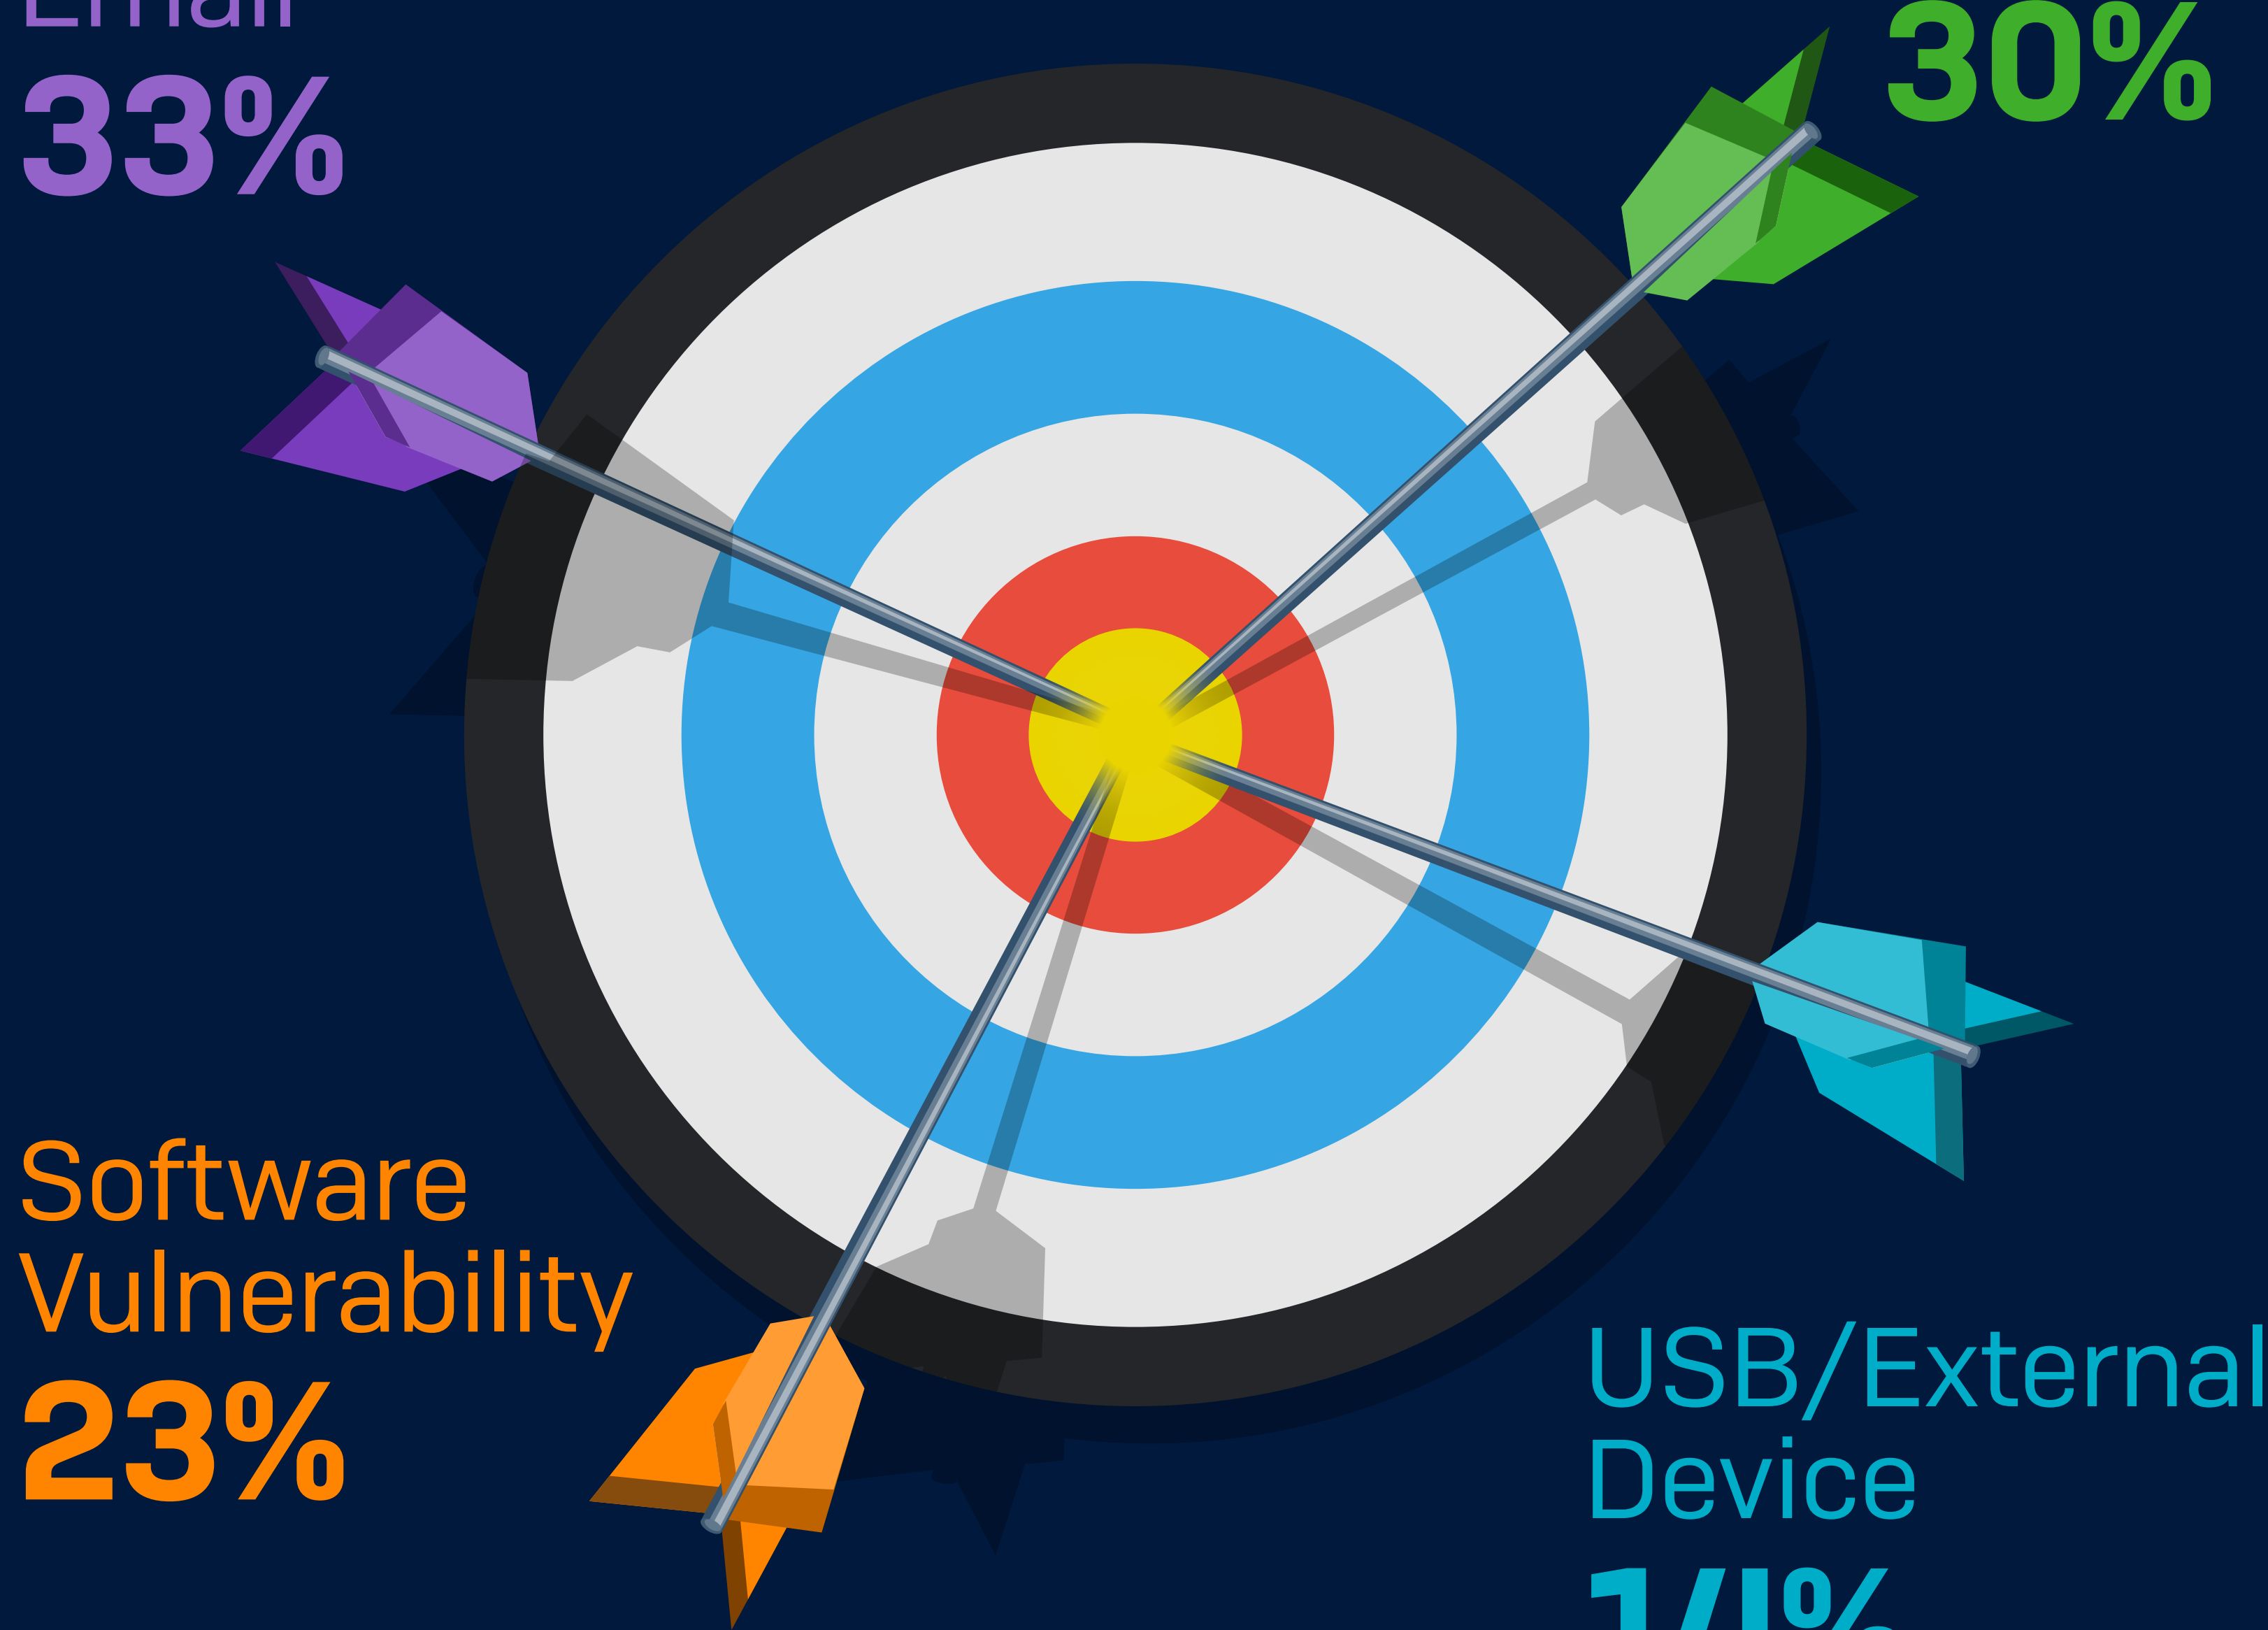

Organizations are struggling to stop cyberattacks

Two in three fell victim to a cyberattack in 2018

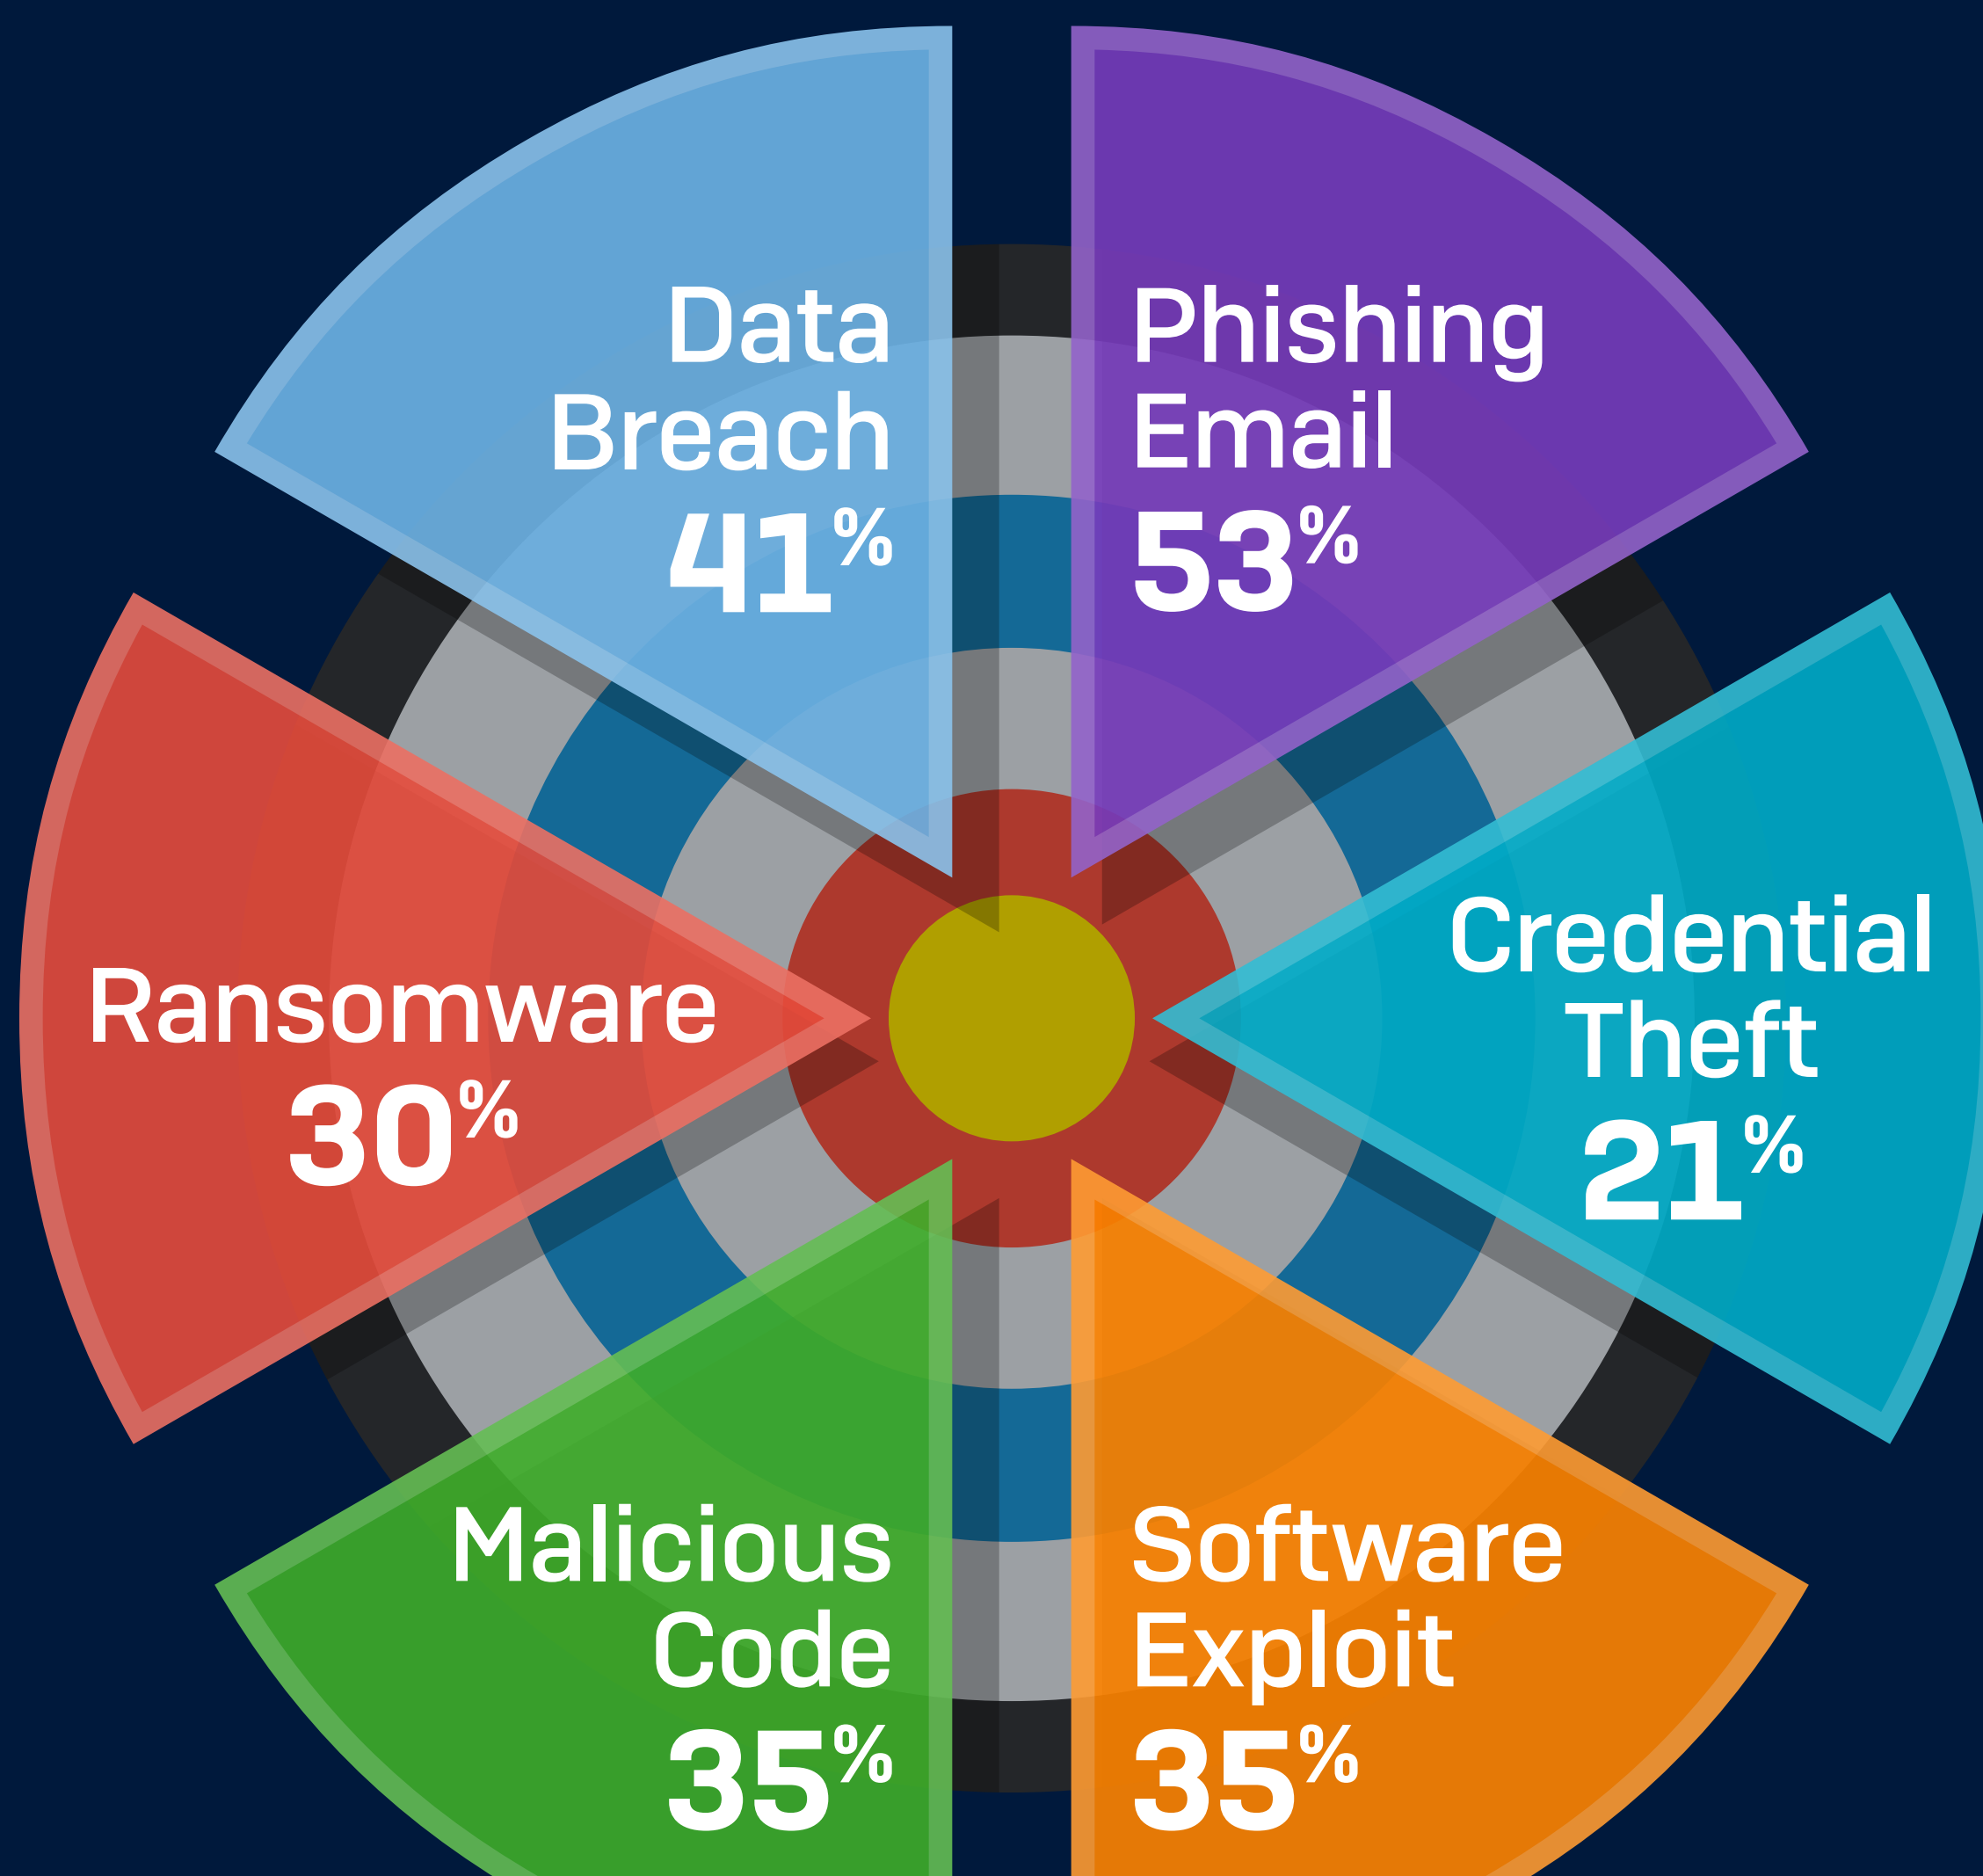

WHY?

Attacks come from multiple directions

Attacks are multi-stage, coordinated and blended

Multi-stage attacks are now the norm with victims experiencing multiple attack techniques

Percentage of cyberattack victims that experienced each threat technique

Time, talent and technology are in short supply

Time for a different approach?
